## WELCOME

Over the years, our interior design and build team have worked across a wide variety of prestigious projects, from luxurious apartments and heritage buildings in some of London's prime locations.

Specialising in bespoke, high-end interiors, we've created beautiful living spaces for both private and commercial clients, placing great importance and commitment to marrying skilful interior design and construction which are truly reflective in our interior design portfolio.

## HENDON

PRIVATE | RESIDENCY

In this spectacular home, we created contemporary design with touch of Chinese elegance bringing true culture into the residence. We have orchestrated a unique ceiling design with delicate up and down-lighting.

The colour coordination is a rich combination of natural shades such as white painting, cream flooring and brown finishing's completed with an opulent navy-blue velvet sofa.

The bar, television unit and dining table are all made in Italy by a specialist manufacturer. Materials uses compromise velvet, suede and elegant wood varnished furniture.

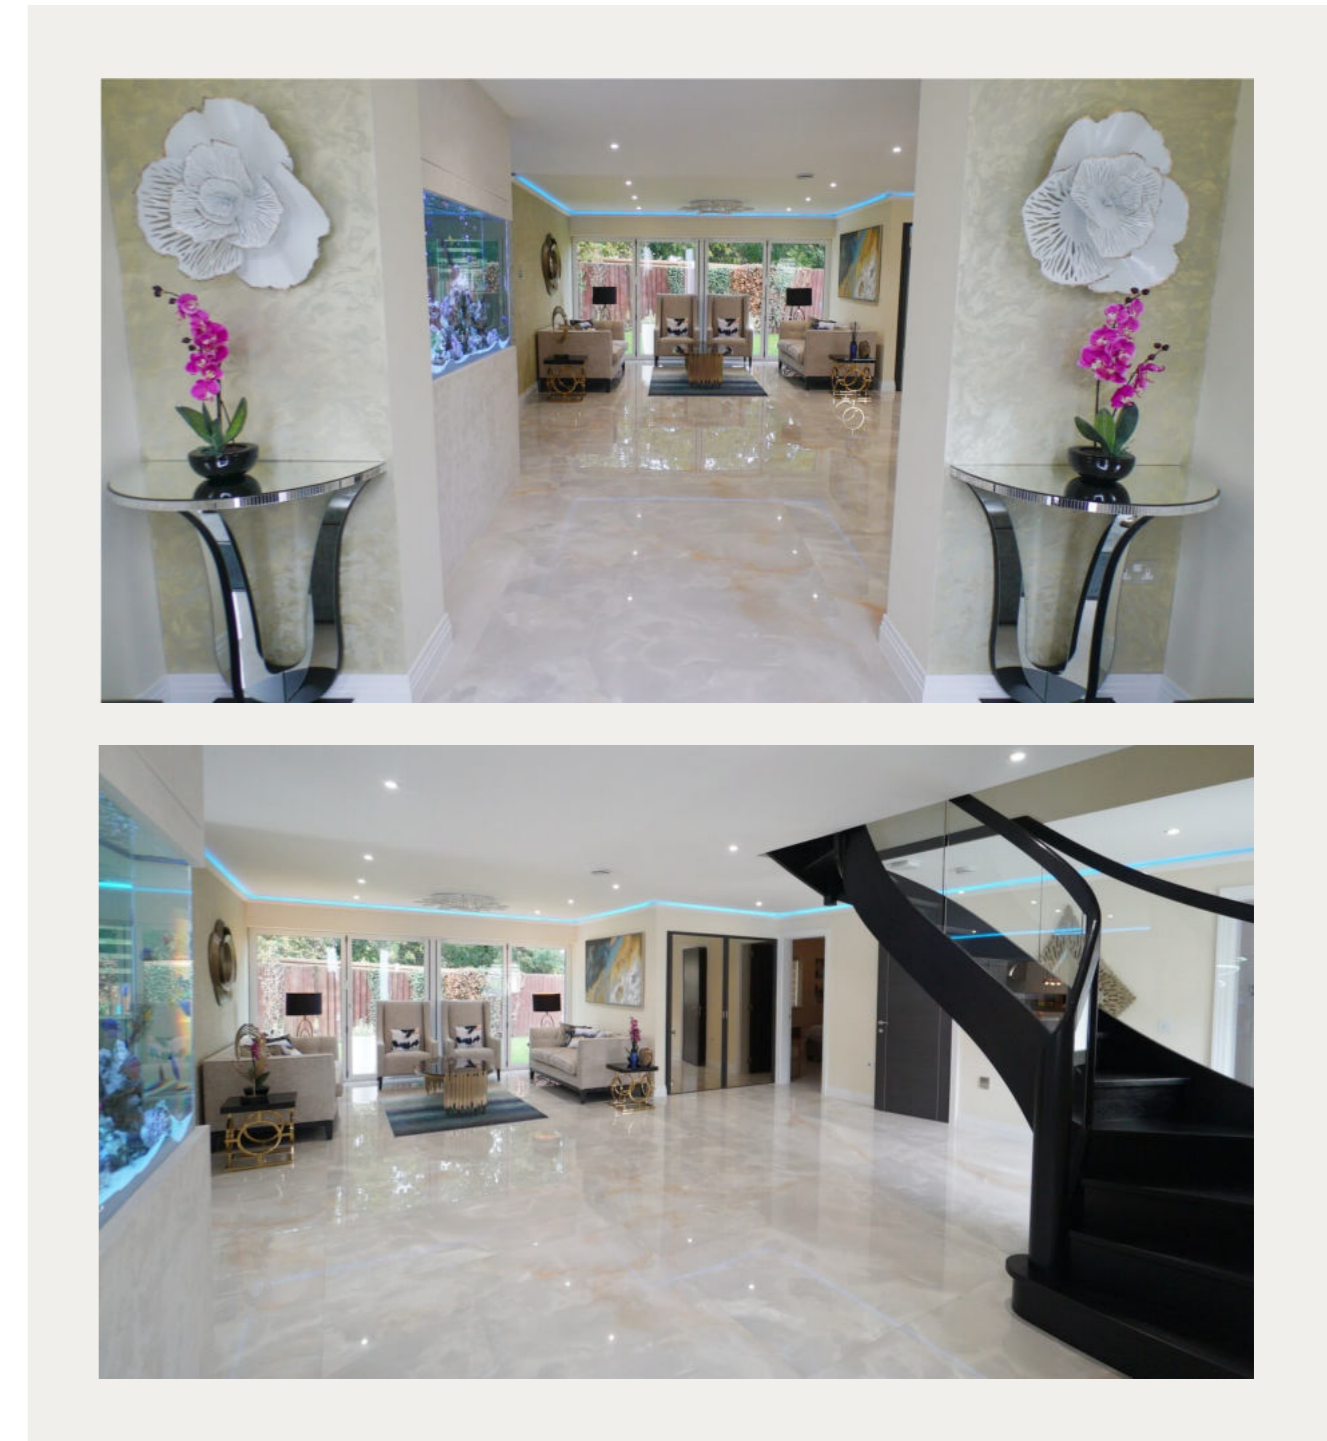

## BEXLEY

PRIVATE | RESIDENCY

Deccori took care of all internal aspects of design from initial planning through furniture, fitting and equipment selection to styling of property with decorative paint finishes, mirrors and accessories.

Along with the building company carry out the structural work to high standards also creating an outstanding feature wall aquarium. Designed all bathrooms from plumbing plans to final accessories.

Design and customised kitchen toward the client's need and coordinated furniture set out with lighting and electrical layouts creating a beautiful jet well-coordinated layout.

## SOUTH WOODFORD

PRIVATE | RESIDENCY

The style objective was to create a sense of continuity from one space to another, marrying modern elegance with contemporary features and detailing. This was also reflected in the style of furniture selected for this scheme.

We bespoke cabinetry and a beautiful light-filled space provides the background inspiration for this brilliantly simple and simply brilliant, uncluttered, minimal patinated kitchen. Both luxurious and elegant, this add a unique finish provides a perfect contrast to the cool white matt lacquer kitchen with its elegant honed limestone worktop.

## MASTERING LIGHTING DESIGN

In this splendid brand new build, we had to plan ahead all the internal features, such as the partition walls and the electrical and lighting layout. This gave us a great opportunity to coordinate the entire lighting and electrical layout, in combination with the furniture's arrangement.

The lighting in the house has been customised in line with the space and measurements. This is especially true in the entrance hall, where a pendant light has been re-designed to maximise its length. As a result, the dazzling lights can be appreciated from all 3 levels of the home, including from the ground floor.

## ST JOHN'S WOOD

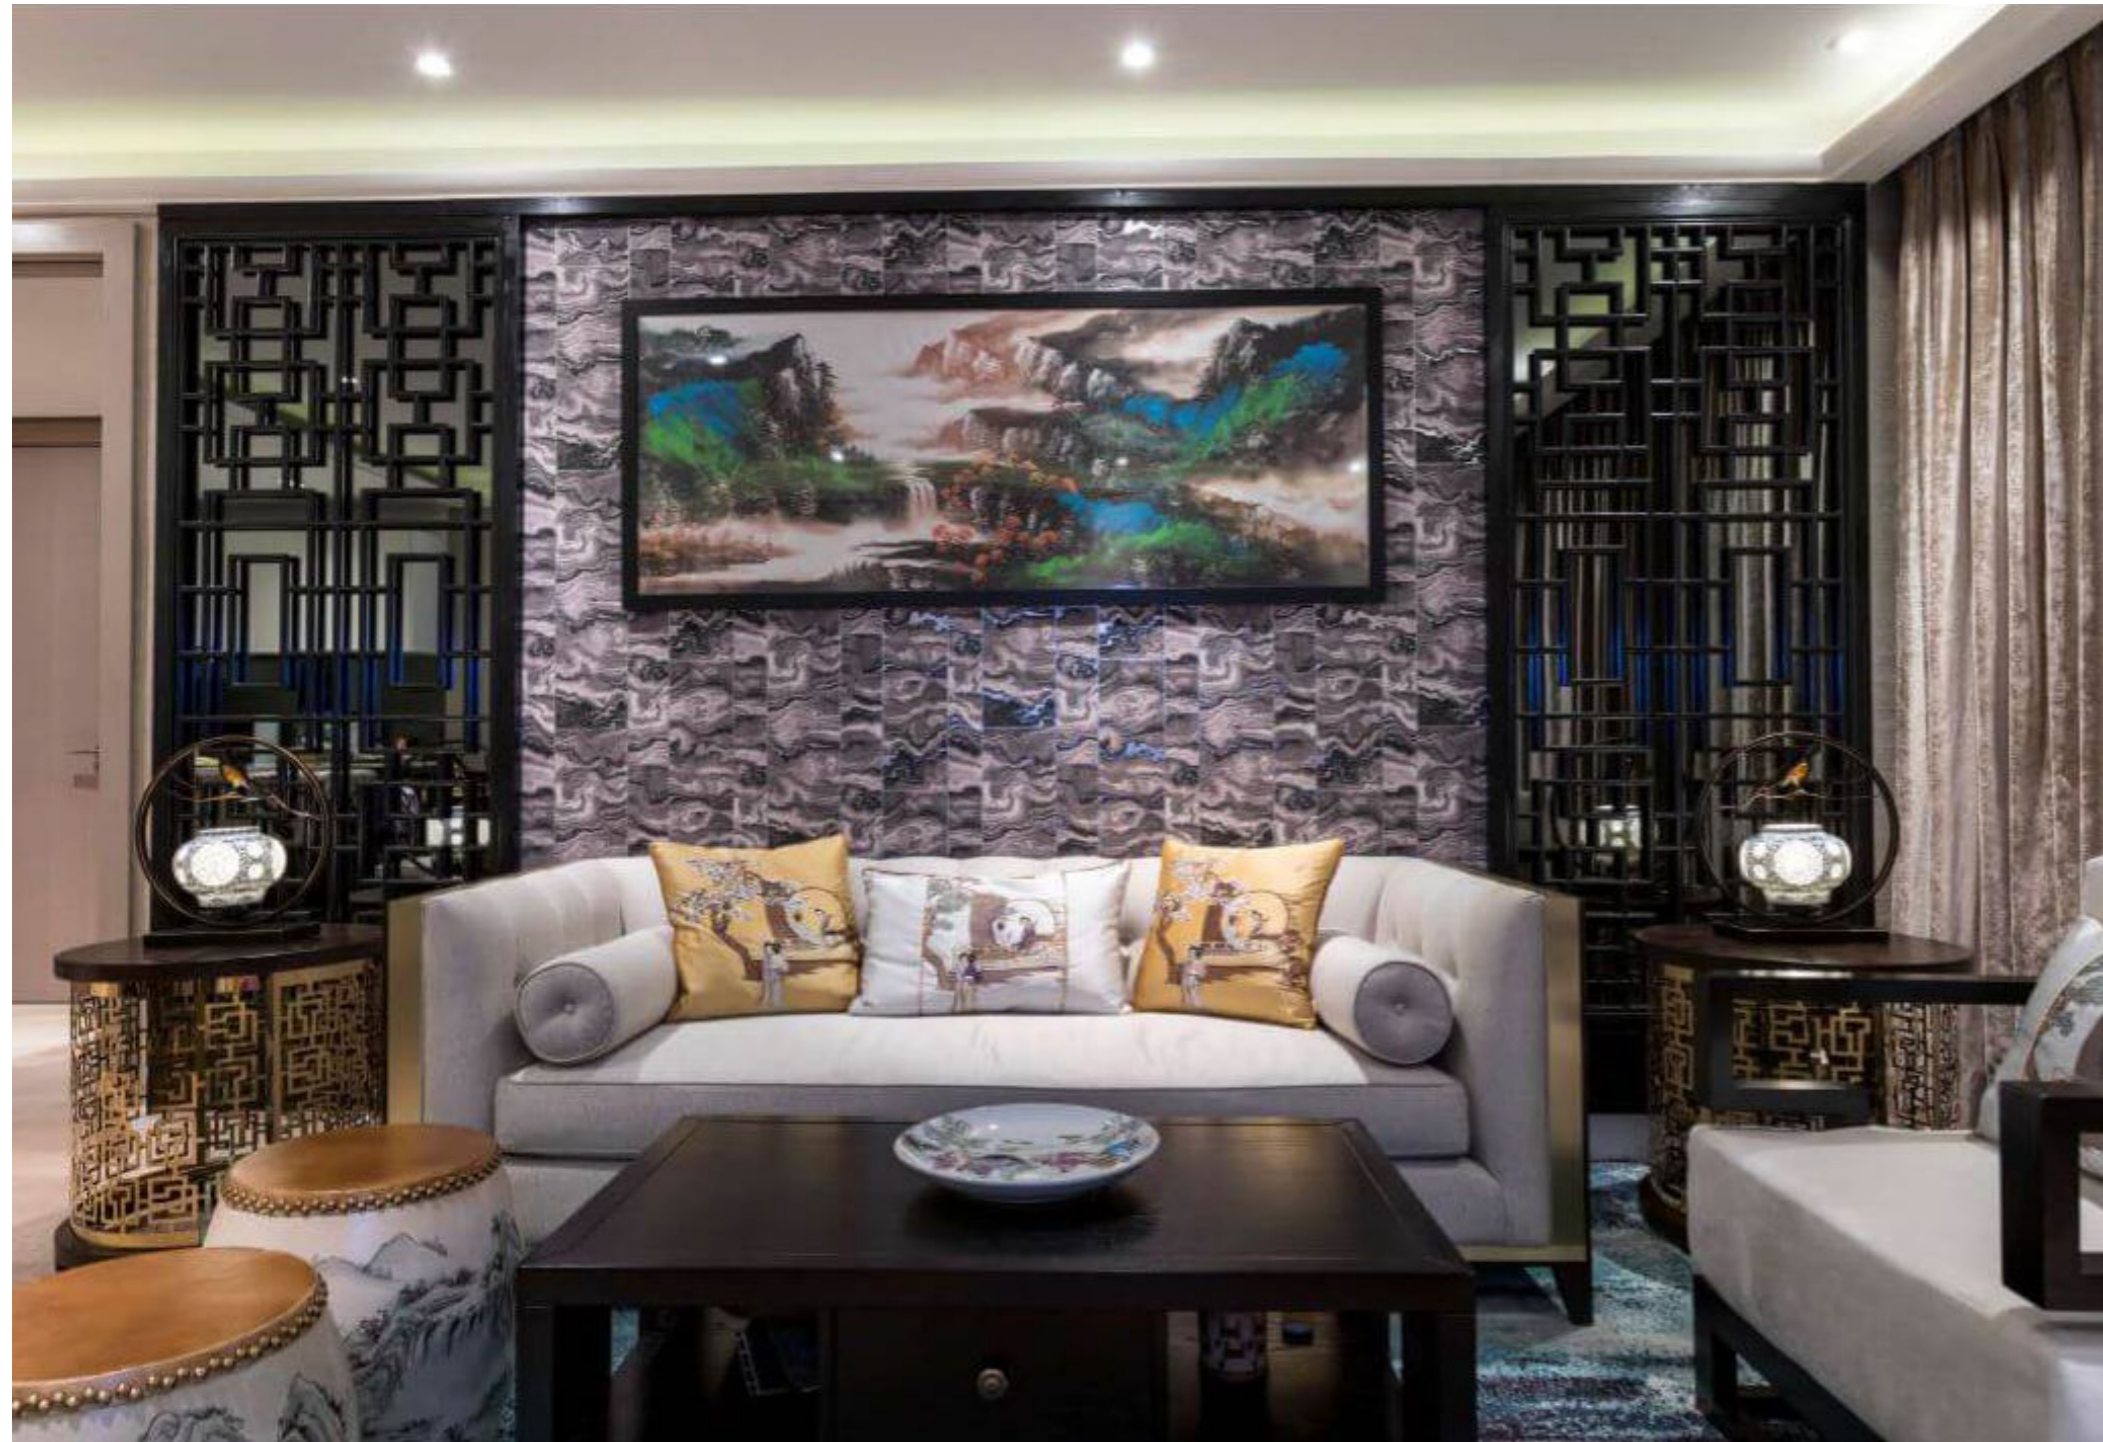

PRIVATE | RESIDENCY

An incredible space designed for our client's apartment in 2014. This property, based in St John's Wood, was an ultra-contemporary project where only high-end items were used across several rooms.

The master bedroom (shown bottom right) had a modern floating bed installed, with an accompanied high padded headboard.

Well-travelled and with a taste for the finest finishes and fabrics, our inspiration came from each family member's personal tastes and lifestyles, which we reflected in the apartment's new design. In addition to the FF&E, bespoke pieces to create a unique touch to the apartment.

## HAMMERSMITH

LUXURY | APARTMENT

In this new apartment, we integrated a classy oriental style throughout the whole property. The Chinese themes have been introduced in the cushions, wallpapers and features wall providing the client with a strong sense of oriental heritage.

Every level of detail was fully considered to ensure the team delivered our client's ideal home in the end, they were very thrilled to get exactly what they dreamed of.

## CHISLEHURST

PRIVATE | RESIDENCY

Deccori had the pleasure of providing FF&E services to our clients' apartment located in Chislehurst. Deccori sourced and specified also all new furniture according to our client's taste.

The brief was to modernise this family apartment using beautiful tones, fabrics and furniture. A richly textured chair and beautiful modern coffee table. Rich brown provide warmth and depth to this elegant neutral scheme with varying textures.

## DETAILS DO MATTER TO US

In this family home in Chislehurst deccori created an outstanding family friendly design. While using some of the clients existing furniture we manage to coordinate an old furniture and tie it in with new pieces. While using a dazzling pendant light and lots of accessories we completed the scheme with amazing effect.

Deccori created an amazing wall picture collage on client request accommodating all the family photos. Creating an outstanding feature seen directly on entry.

## LIMEHOUSE

PRIVATE | RESIDENCY

Clean lines and smooth textural finishes, we make sure every single piece of furniture suits your style and brings a true reflection of your personality. We guide you on how to pick the correct materials and finishes for complete home decor. Custom made dining chair for our client.

Decori set out to create a unique yet versatile space to meet all needs for any future home owners. By adding strategic layout design we were able to set this property aside from the standard 'show home' styles.

The seat has been carefully conceived to provide support while simultaneously inviting you to dine gracefully. Not only we helped our client choose the design and all the details, we ensure our custom pieces are safe to use and durable.

One of the biggest considerations for the project was ensuring the design worked in perfect harmony with our clients' taste.

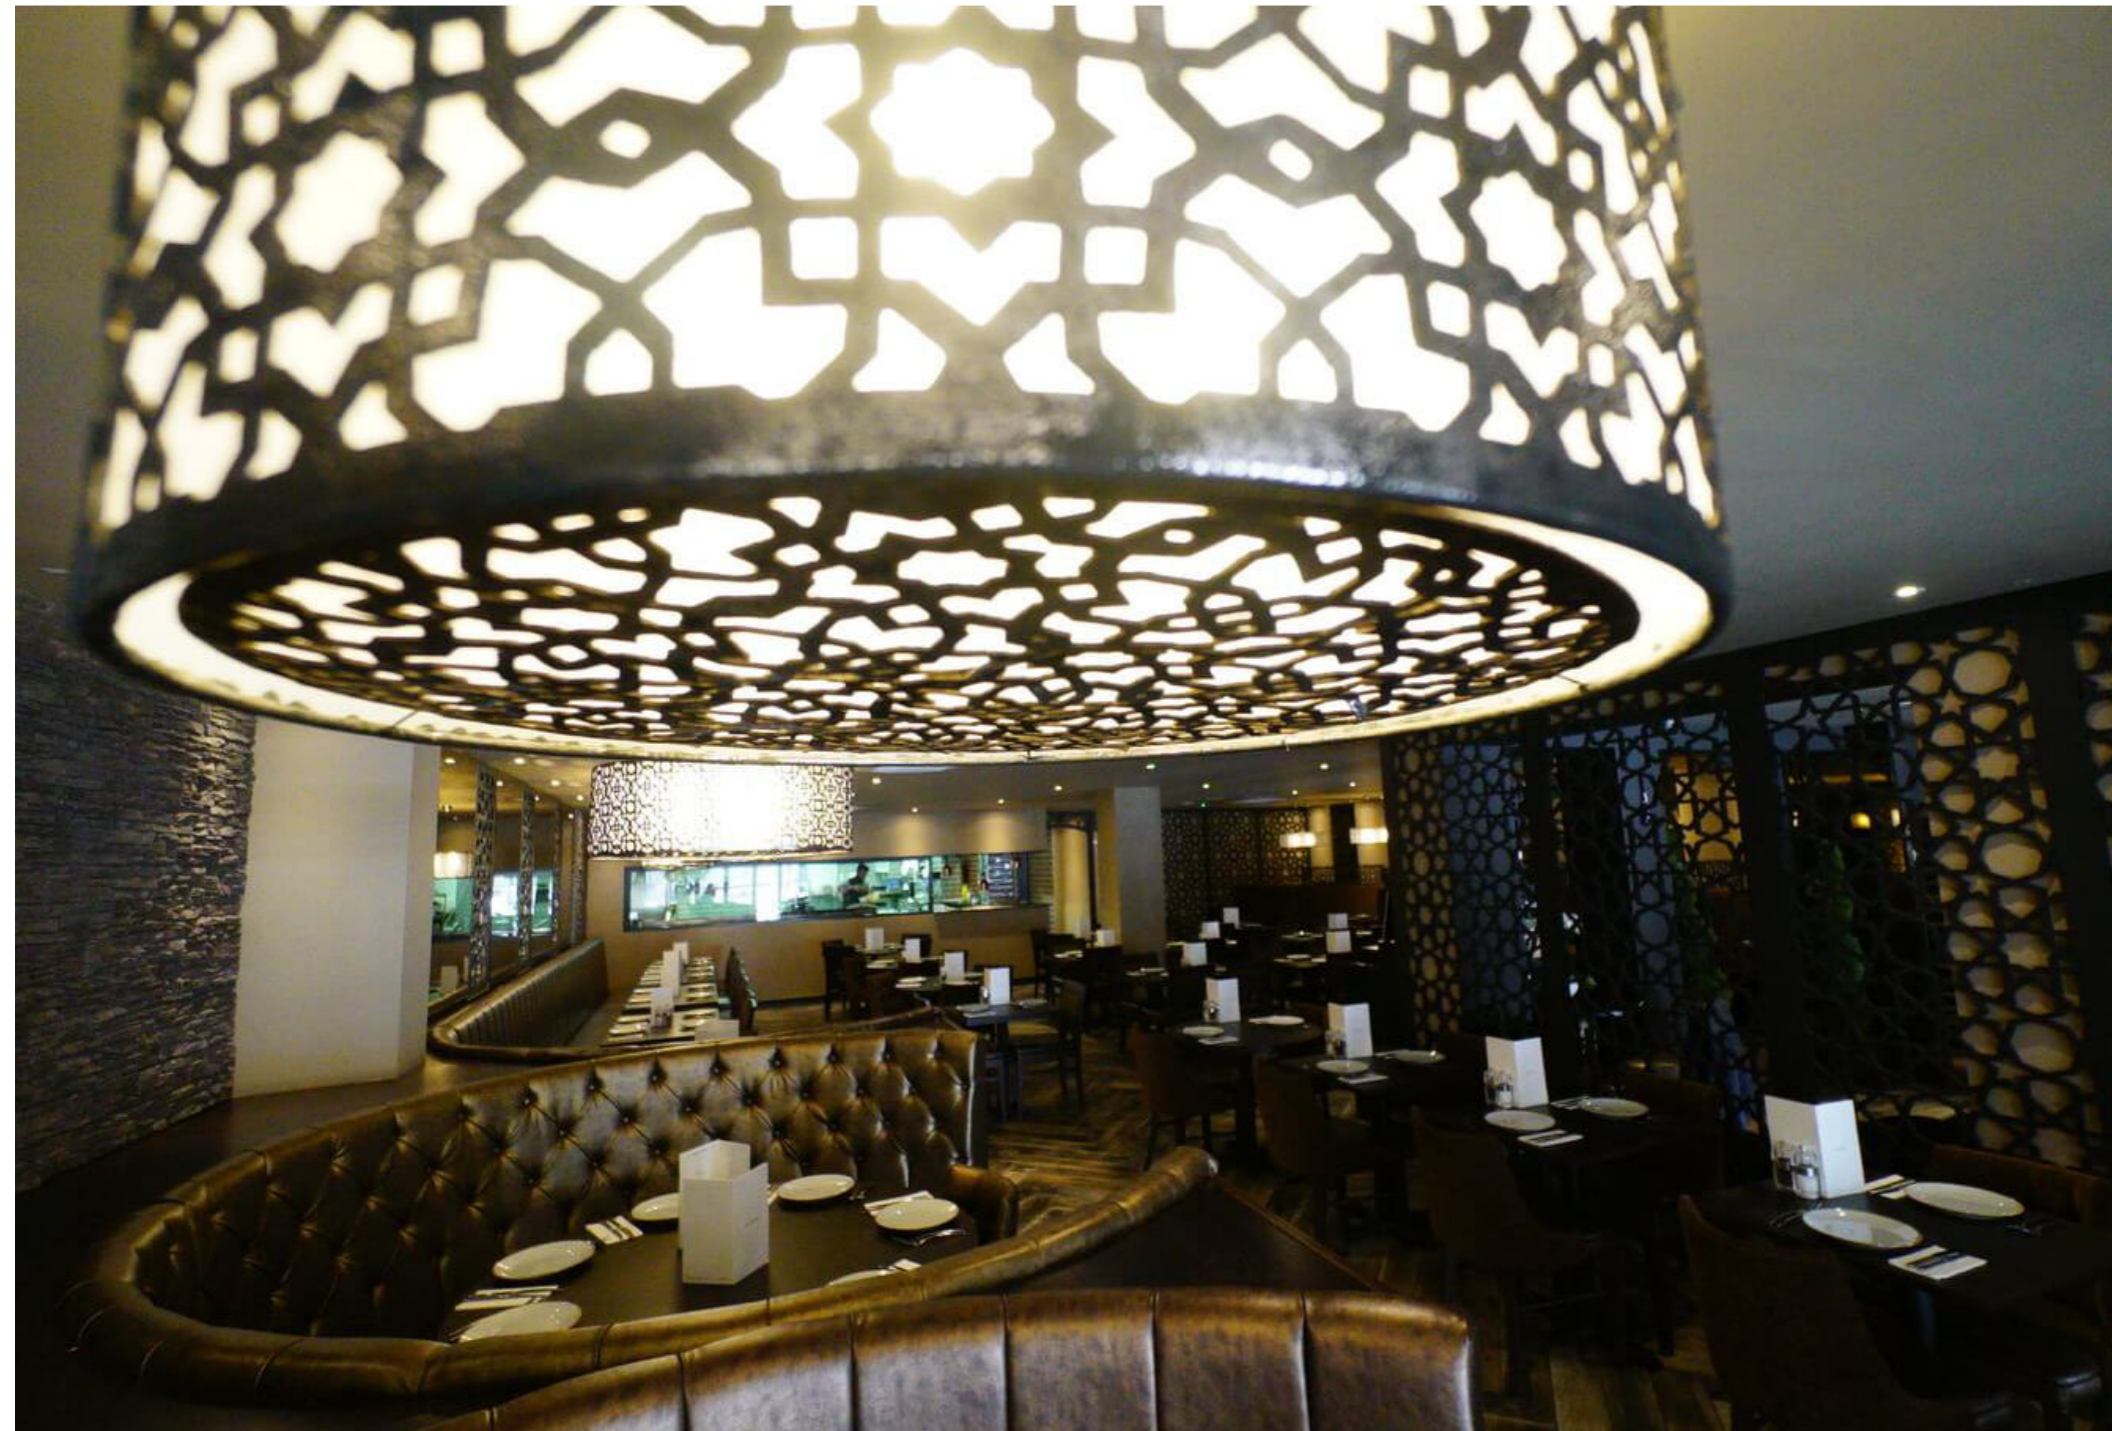

## A DINNING EXPERIENCE

The client was looking for a fresh approach with someone who would not rely on traditional finishes and methods to achieve the 'usual' decor but who could blur the line between residential and commercial work.

In the restaurant the client wanted distinct areas for the different food offerings. Further planning and commercial interior design by the team included working with the developer's engineers to create the bespoke seating floor plan.

Lighting design also played a large part in this project and our team made the most of every opportunity, by offering bespoke lampshades. The schemes in the various areas make use of much darker and richer tones and dark timber.

Positive: Quality

We were looking to extend our house and both my and my wife acknowledged that interior design was not our forte. We scoured the Internet and were drawn to Daria because she had both interior design and architecture experience.

She was absolutely brilliant, she spent time to understand how we live in the house - what our thoughts were and was not afraid to challenge our thinking in a positive way. We actually ended up asking our architect to modify our design and I learnt the value the hard-way of having somebody with Daria's skill-set and experience from the start.

We are about to embark on our new project and will be engaging Daria from the start, I can recommend her highly - top quality work, great interpersonal skills and invaluable experience and knowledge.

Shes genuine only wants the best for her clients and im so pleased to find this amazing, talented lady with loads of contacts and product category at her fingertips.

So exciting... thank you Daria.

All projects were completed with the highest level of detail and very easy to communicate.

Please ask Daria for the professional photos. A  
Happy to share. :).

Relationship  
Client

Hired Daria to help me with functional design of kitchen and bathroom within a full renovation project. I had already done a lot of work on those, but she refined the kitchen design with great ideas based on her experience and she made my kitchen much more practical and of better quality for a lower cost than I had had quotes for. She was attentive to my requirements and provided great solutions to a few problems.

Client

Daria is very efficient to work with. Always responsive to our Emails.

She also has nice taste for oriental design. Competent interior designer all round.
